1. Correlation of preoperative measurement of cerebral perfusion pressure (ecpp) and estimated intracranial pressure (e icp) as estimated by transcranial doppler on neurological outcome in patients with aneurysmal sub arachnoid haemorrhage undergoing surgical clipping  
   Shamik Paul, Ketan Kataria, Sumit Bloria, Ankur Luthra, Hemant Bhagat, Nidhi Panda, PGIMER, Chandigarh

2. Comparison of effects of propofol and dexmedetomidine on motor evoked potentials in neurosurgery: a prospective randomised single blinded interventional study  
   Soniya Biswas, Smita Vimala, Unnikrishnan Prathapadas. Sree Chitra Tirunal Institute for Medical Sciences and Technology, Thiruvananthapuram, India

3. Intraoperative visual evoked potentials in skull base tumors: our experience.  
   Ravi Kumar M. Yashoda Hospitals, Secunderabad, Telangana, India

4. Comparison of TIVA Vs Inhalational anaesthesia technique on perioperative outcomes in patients undergoing elective neurosurgical procedures  
   Sashmita Kumari Padhy, Manikandan, Ajay Prasad Hrishi Division of Neuroanaesthesia and Neurocritical care, SCTIMST, Trivandrum.

5. A Randomized Pilot study on effect of ketamine on transcranial electrical motor evoked potential in patients undergoing spine surgery  
   Roshan Andleeb, Priyanka Gupta Department of Anaestheiology, AIIMS, Rishikesh, Uttrakhand, India

   Ankur Dhanda, Gyaninder Pal Singh, Ashish Bindra Department of Neuroanaesthesiology and Critical Care, AIIMS. New Delhi, India

7. To Determine the Incidence and Risk Factors of Post-Operative Pulmonary Complications after Craniovertebral Junction

  Postgraduate Institute of Medical Education and Research (PGIMER), Chandigarh, India |
| **8. Evaluation of respiratory morbidity and outcome in traumatic cervical spinal cord injury: A retrospective study** |
| Ashish Bindra, Deep Sengupta, N Kumar, Sunil Routray, Arvind Chaturvedi  
  AIIMS, New Delhi, India |
| **9. Serum Lactate, Base Deficit and Blood Glucose Levels as Prognostic Markers in Severe Traumatic Brain Injury** |
| Ratnesh Kumar Shukla, Keshav Goyal, Charu Mahajan  
  AIIMS, New Delhi, India |
| **10. Comparison of changes in EndotrachealTube Cuff Pressure in Supine and Prone position in patients undergoing neurosurgery.** |
| Arun KMC |
| **11. Comparison of propofol and ketofol ontranscranial motor evoked potentials (TcMEPs) in patients undergoing thoracolumbar (TL) Spine surgery** |
| Ankur khandelwal¹, Arvind Chaturvedi¹, Navdeep Sokhal¹, Akanksha Singh², Hanjabam barun sharma²  
  1. Department of Neuroanaesthesiology and Critical Care, AIIMS, New Delhi  
  2. Department of Physiology, AIIMS, New Delhi |
| **12. A comparative study of Duloxetine with Pregabalin as preemptive analgesic in Lumbar Spine Surgery.** |
| Dr Arman *, Dr Obaid Ahmad Siddiqui  
  Jawaharlal Nehru Medical College & Hospital, AMU, Aligarh. India. |
| **13. Original article- Effect of intraoperative aneurysm rupture on perioperative complications and neurological outcome in adult patients undergoing surgical clipping for aneurysmal subarachnoid haemorrhage - A retrospective study** |
| Rashmi Mahapatra, Nayani Radhakrishna, Ankur Khandelwal, Rajendra Singh Chouhan, Mihir Prakash Pandia, Ashish Suri  
  AIIMS, New Delhi |
Rupali Brahma; Subodh Kumar; Deep Sengupta; Ashish Bindra, Niraj Kumar, Navdeep Sokhal
Dept. of Neuroanaesthesiology & Critical Care, AIIMS & JPNA Trauma Centre – New Delhi

15. Ultrasound assessment of diaphragmatic function in mechanical ventilated TBI patients
Subodh Kumar, Deep Sen Gupta, Rupali Brahma, Ashish Bindra, Keshav Goyal, Gyaninder Pal Singh
Department of Neuroanaesthesiology and Critical Care, JPNATC, AIIMS, New Delhi

Soniya Biswas, Smita Vimala, Unnikrishnan Prathapadas, Sree Chitra Tirunal Institute for Medical Sciences and Technology, Thiruvananthpuram, India

17. Cardiovascular complications after traumatic spinal cord injury
Burman S, Kumar N, Rath GP, Bindra A, Chaturvedi A, Goyal K
All India Institute of Medical Sciences, New Delhi, India
